

MY 2021 PHILOSOPHICAL GUIDE

Here are the core principles that will influence my commitments this year.

1/GROW.

Focus on making small, consistent and continuous improvements.

"Whatever will last long will take time to mature." -OAO

2/OPTIMISE.

Be efficient in the use of all resources at your disposal.

"When you make the most from the least you've got, higher targets will not scare you." -OAO

3/PIVOT.

Build on systems that have produced results but require improvements to scale.

"The success of the past are the only foundations that the future can be built upon." -OAO

4/PRODUCE.

Offer value to the extent of your capacity but beyond the expectation of your customers.

"Effort is wasted when value is not created." -OAO

5/DARE.

Boldly explore possibilities without a consideration that a failed attempt will be embarrassing.

"It is not until you try that you can experience the possibility of triumph." -OAO

6/STRATEGISE.

Make plans to experience the things you see in others and have imagined to see in your life.

"Without plans, possibilities do not become realities." -OAO

7/COLLABORATE.

Partner with others to limit the effect of your weakness and extend the contributory value of your strengths.

"Many people suffer because they do not know what their network can offer." -OAO

8/SELL.

Transfer value to others for a profit by making them aware of and interested in the outputs of your creative enterprise.

"There's no future in an enterprise that offers value without an exchange for a reasonable price." -OAO

I depend on the grace of God to help me engage these vital principles as I commit myself to the development of self and the addition of value to those around me.

I am an advancing and a value adding personality!
