

2024

Philosophical Guide

This annual Philosophical Guide - in its 4th year now - reflects my attitude towards professional engagements for the year.

They are principles upon which all my interactions will be based.

They are the anchors on which I will hinge the deployment of my capabilities.

They are the reasons behind my readiness to pursue opportunities.

They are the elements of my pursuits for the year.

These are the deciders of my availability to engage with people or institutions.

By them, I will measure my progress in the year and conclude on its success or otherwise.
